

We are the Australasian Society
for Intellectual Disability.
We call it ASID.

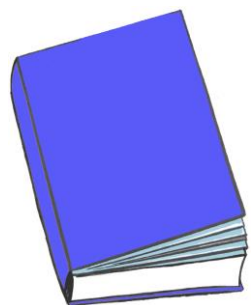

We tell people about
these studies.
They plan the best help for you.

You have an intellectual disability.
We want you to have a good life.

It helps you to have the
same rights as other people.

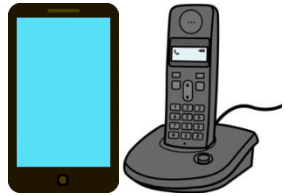

There are studies that help.
They find out what you

- want
- need.

It helps you to have the
same choices as other people.

What we try to do.

We call it our mission.
