

About this book

Special thanks to

- Kevin
- Nateace.

They read fact sheets.

They talked about the images.

Their ideas are in all these fact sheets.

introduction to prevention and cures - all ag

Ceederd polys (CP) is a permanent movement disorder coused by injury to the disvelsinging brain. Theriscoals, people believed that CP was caused by a look of experiment after the disht instead of the country, are not known but there are many different risk instead of the country, we now known but there are many different risk instead and country of CP complies of risk factors include preterm intrinsication, must play letter and country of the country o

As risk foothers and sources of CP have been identified, research host locused on finding opportunities to prevent other children from developing CP. For children born preterm, there are now treatments such as magnesium sulphote and controctededit, as well as improved care in the recreation intensive core unit. Collectively, these can help to protect the biss in from damage.

There are also now options for criticism born full farm who sustains a break hypothesis such as therapeutic cooling for bobbs who are very invested to this? Strategies like varionations, legrowed surgical core and public health researages are also helping prevent CP coused by brain in July in the first two years of life. The accord peace is used to see that these strategies are produced. The CP Brainland.

prevent or reduce the seventry of CP, including disags to protect the brain, and strategies to prevent preterm bit had alreaded.

For people living with CP and their families, many are adjet to know if there is a cure for CP, or whether one might be developed soon. Gurrently there is no know use for CP in fact, because CP has see many different double, it is not readed to the control of the control of the see many different double, it is not readed.

for different situations.

One field of research that offers promise in this area is stem cell therapy. We already know that some stem cell types can have a avail but positive effect or areas more functions. Now studies one meride to find out which stem cell.

item cell research is an crea of high interest for many in the CP community, and leaptive a lack of clear evidence, many people with CP and their formities are controlly seeking out us proven treatments. Asid from som cert people period rectments such as given therapy may one day be helpful and brand-new The fact sheets are based on papers by
