

# **Our new study**

## **Can you help?**

We are CIRCA. Our long name is Culturally Inclusive Research Centre Australia.

We do studies with

- people with disability
- people who speak a different language. Like Korean.

The studies may be with

- Aboriginal people
- Torres Strait Islander people.

We ask different people what they

- like
- think
- need.

It may be about what the government do. It may be a disability service.

We talk about

- what help they get
- what different help they need.

We listen to what different people say. We write a report. It says what people

- think
- need
- want.

We give the report to

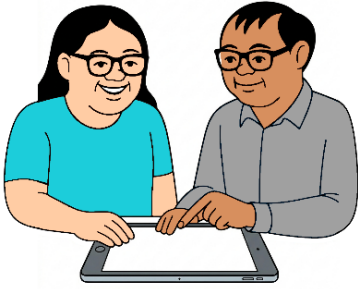

- government
- the place who asked for the work.

It helps them do things better. It helps them plan new things.

You may want to help us. You will talk to people. You will find out

- what they think
- what they need.

You will be a researcher. You will be paid.

## **This study**

This study is about the MiAccess website. You will look at parts of the website.

We want to know what people think. Like is it

- good
- OK
- needs to be better.

We want to know how people use the website.

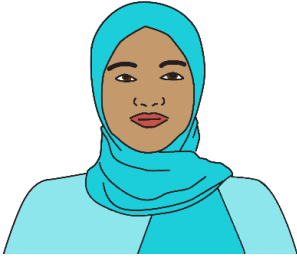

Like can they find what they need?

It may be there is a swimming group. Any person can join.

A woman wants a swimming group.

**But**

It must be for women only.

## Can you help us?
